

T.S. Interactive Solutions Inc.

Transforming Your Interactive Experience

Transforming your Interactive Experience

T.S. Interactive has a solution for you, from an extensive range of commercial grade Interactive bonded PCAP and Ultra-Slim Infrared (IR) 4K UHD Touchscreens, Wireless Collaboration Solutions, Digital Signage, Video Conferencing, Mobile Stands, Assistive Technologies and Annotation Software.

Servicing Businesses, Government, Education and Healthcare, we have you covered with trusted Audio-Visual Dealers and Partners across Canada and the United States.

Interactive Touchscreens

The IR Touchscreens is our core product range. All systems have a Built in Android Operating system making them IoT ready, with auto-switching inputs, meaning as soon as HDMI and USB are connected, and the screen detects this and dynamically switches the inputs for an enhanced user experience.

Available sizes 55" 65" 75" 86" and 98"

HDi-Edge New Generation

- 4K native resolution (3840 x 2160px)

Wireless Solutions

AirServer

We are excited to introduce the AirServer app for HDi series screens.

Both our HDi Edge and Pro series screens will benefit from AirServer's world class wireless presentation technology. HDi screens will now boast 'walk-up' wireless streaming at 30 frames per second from devices using Airplay, Miracast and Google Cast. This means no external application is required on the user's device.

- All-in-one Screen Mirroring Receiver
- 4K UHD 30 FPS
- Airplay + Miracast + Google Cast
- 2 connections simultaneously
- 10 touch points
- Control devices from the receiver (only Windows/Android devices)
- No external application required on user's device.

HDi & AirServer are working together

AirServer CONNECT 2

AirServer has taken the best quality hardware it could find, installed its own operating system, taken the best of everything they've learnt in the last couple of years of screen mirroring and put it all into one box.

- All-in-one Screen Mirroring Receiver
- **4K UHD 60 FPS**
- **AirPlay + Google Cast + Miracast + Wireless Guest Network**
- Display content **without** installing a 3rd party app
- **8+ connections simultaneously**
- 10 touch points
- Moderator mode
- Control devices from the receiver

Collaboration Solutions

Vivi

T.S. Interactive Solutions has a range of exceptional wireless mirroring solutions.

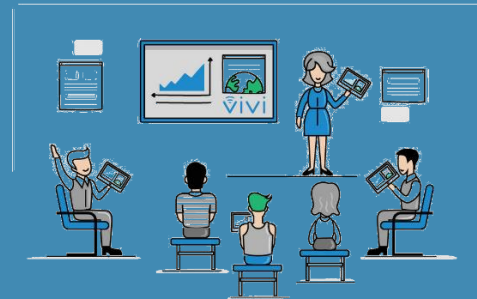

Vivi™ is a wireless presentation tool that enables teachers and students to share, display, annotate, capture and save information in real time, from any Application and **any device in the classroom or boardroom.**

Vivi has provided relief to IT Administrators, who can now remotely connect, control and update any device through the Portal at a convenient time to minimize disruptions during class time. Vivi is Empowering Students and participants by providing control to share content from your tablet, smart phone, and use the integrated annotation tools.

Key Features

- **Touch Support**
- **School-wide Management**
- Privacy mode
- **Analytics Usage Dashboard**
- Multi-platform software
- **Active Directory SAML Support**
- **BYOD Support**
- Integrated annotation tools
- **Emergency broadcasting**
- Seamless Video Broadcasting

HDi Connect Plus

HDi connect plus transmits video, audio, touch and any application from a laptop or smart device to the presentation screen.

Full mirroring technology showing all content as it is. **Wireless access P2P (Peer to Peer)** high quality video & sound transmission is shared in real time. Switching devices easily just by ONE-CLICK of a button.

No installation of software. No complicated set-up. HDi connect plus also enables touch control through the screen when sharing a PC. With new intuitive interface HDi connect plus shows your devices live and ready to stream.
